BRAND INFORMATION DECK — APRIL 2026

Modern *Savage*

Whole-animal nutrition for the whole family. Every supplement your body needs in one daily scoop - no synthetics, no fillers, nothing your great-grandmother wouldn't recognise. For Olly Westmacott — social strategy brief.

THE BRAND

What Modern Savage is

Modern Savage is a whole-food nutrition brand built around a simple conviction: real food outperforms synthetic supplements every time. Our organ blend powders give families everything they need in one daily scoop - the nutrition humans ate for thousands of years before the supplement industry invented a synthetic substitute.

This is not a niche health brand for men who track macros. It is family nutrition - clean, whole-food, ingredient-led. One product that replaces the shelf of supplements most families are guessing at. 100% owned by the Grylls family, manufactured by ACF Pharma, launching simultaneously in the UK and US in July 2026.

Not a wellness brand. Not a bro supplement brand. Family nutrition done properly.

ONE-LINE DESCRIPTION

"Everything your family needs in one scoop. Whole-animal organ nutrition — no synthetics, no guesswork, nothing invented in a lab."

BUSINESS FACTS

Ownership: 100% Grylls family (Bear Grylls Ventures)

Manufacturer: ACF Pharma / Lightning Nutra (US)

Form: Powder (not capsules)

Launch markets: UK + US simultaneously, July 2026

Route to market: DTC first, retail second

PRODUCT LINEUP

3 SKUs at Launch

Three products, one philosophy. Each serves a different customer need. The Adult Blend is the hero product. The Kids Blend extends the mission into family nutrition. The Add-On Stack is the upsell for the committed customer.

HERO SKU

Adult Blend

~$79 / £62 per bag

28 servings. 21g scoop. Approx 70 calories. The core daily nutrition stack for the health-conscious adult. No creatine.

PROTEIN

Primal Protein Blend	**10,000mg**
Grass-fed Bovine Collagen Peptides + Beef Protein Isolate	

GUT HEALTH

THE CORE — ORGAN BLEND

Primal Organ Blend	**2,500mg**
Grass-fed Bovine Liver, Heart, Spleen, Kidney, Lung + Bison Liver	

MICRONUTRIENTS

Essential Nutrient Superfood Blend	**1,275mg**
Marine Algae, Acerola Cherry, Pink Salt, Broccoli, Spinach, Kale, Pumpkin Seed, Sweet Potato, Sunflower Seed, Cranberry, Chlorella, Maitake + Shiitake Mushroom, Fermented Vitamin K2 MK-7	

ANTIOXIDANTS

Superfruit Antioxidant Blend	**1,000mg**
Organic Date, Goji, Acai, Maqui, Blueberry, Blackberry, Strawberry, Raspberry, Acerola Cherry	

FLAVOUR

Organic Honey Powder or Maple Powder, Organic Vanilla Bean, Bamboo Extract

UNIT ECONOMICS

COG: ~$24.45 @ 2,500 units / ~$22 @ 10,000 units
DTC margin: ~64-67% at $79 retail

FAMILY SKU

Kids Blend

~$69 / £55 per bag (est.)

28 servings. 20g scoop. Same philosophy as the Adult Blend, reformulated for children. Smaller organ dose, colostrum added, lower vitamin thresholds.

PROTEIN

Savage Kids Primal Protein Blend	**10,000mg**

Prebiotic / Probiotic Blend	**3,500mg**
1 Billion CFU (half adult dose)	

THE CORE — ORGAN + COLOSTRUM

Savage Kids Primal Organ Blend	**1,250mg**
Grass-fed Bovine Liver, Heart, Spleen, Kidney, Lung + Grass-fed Bovine Colostrum	

KEY DIFFERENCES VS ADULT

Organ blend dose	**Half (1,250mg)**
Vitamin D	**25mcg (vs 40mcg)**
Vitamin K	**60mcg (vs 90mcg)**
Creatine	**None**

ALLERGEN

Contains Milk (Colostrum). Must be declared on label and in all marketing.

UNIT ECONOMICS

COG: ~$22.28 @ 2,500 units / ~$20 @ 10,000 units

UPSELL SKU

Add-On Stack

Pricing TBD

The upsell for the committed customer. Designed to sit on top of the Adult Blend for those who want to go further. Formulation is in development — will stay true to the whole-food philosophy.

WHAT WE KNOW

- Designed to stack with Adult Blend
- Micronised creatine (3g, German-sourced, EU-ready)
- For customers who are already on the Adult Blend and want the fuller stack
- Formulation currently being finalised

FOR SOCIAL STRATEGY

Position as the "go further" option for those already on the Adult Blend. Creates a natural upgrade path and increases LTV.

TARGET AUDIENCE

Who we're speaking to

🏡

The Family-First Adult

Adult, 28-45, any gender. Fed up with the synthetic supplement shelf. Wants one product that covers the bases without having to become a nutritionist. Values clean ingredients, real food, simplicity.

- Wants convenience — one scoop, not 12 different capsules
- Sceptical of synthetic vitamins and filler-heavy powders
- Trusts whole-food sourcing over lab-manufactured compounds
- Bear Grylls is credible because he actually lives this

Will pay more for quality they can verify on the label
Buyer is a parent or athlete looking for something that lasts

👪

The Parent — Kids Blend Buyer

Parent (25-42, purchasing for their children). Reads labels. Disillusioned with gummy vitamins and synthetic kids supplements. Wants the cleanest possible nutrition for their family.

- Questions synthetic ingredients — prefers whole-food alternatives
- Frustrated with the kids supplement category (gummies, dyes, sugar)
- Bear Grylls = credibility for a parent who cares
- Will pay more for clean, verifiable ingredients
- Family nutrition is a values statement for them
- Note: must declare milk allergen (colostrum)

🌿

The Whole-Food Convert

Already eating clean. Already reading labels. Looking for the supplement that matches that philosophy. Doesn't want a biohacking stack — wants one honest product that replaces the rest.

- Pays attention to food quality, not just calories
- Eats clean but gaps in micronutrients frustrate them
- The "all in one" pitch solves a real problem for this buyer
- Not trend-driven — has tried and rejected most of the category
- Highest repeat-purchase potential once trust is established

> *"It is not for people who want to optimise. It is for people who want to eat properly - and have one simple way to do it."*

BRAND VOICE

How Modern Savage sounds

Modern Savage speaks to families who want real answers, not marketing. The product is the argument. The formula is genuinely impressive. The voice is warm but direct - it educates on what is missing from the modern diet and lets the product be the obvious solution.

Tone in one sentence

Direct. Conviction-led. Warmly grounded. Like someone who's done the research, made the change, and isn't going back.

WE SOUND LIKE

- ✓ Lead with substance
- ✓ State facts and let them land
- ✓ Ancestral credibility without gatekeeping
- ✓ Bear as proof of concept, not endorser
- ✓ Conviction without aggression

WE NEVER SOUND LIKE

- ✗ Supplement bro energy
- ✗ "Unlock your potential"
- ✗ Hashtag wellness fluff
- ✗ Vague ingredient claims
- ✗ Fear-based marketing

ADULT BLEND — EXAMPLE POSTS

"Most families have 8 different supplements on the counter and gaps in all of them. One scoop of whole-animal nutrition covers more ground than all of them combined."

"Most supplements are molecules isolated from nature. This one is nature. Liver. Heart. Spleen. Kidney. Lung."

"Your great-grandparents didn't have a supplement shelf. They had a whole animal. That's where the nutrition was."

"We didn't invent anything. We just made it easy to eat the way humans actually evolved to eat."

KIDS BLEND — EXAMPLE POSTS

"Kids don't need gummy vitamins. They need the same nutrition they'd get from a well-fed family in the 1800s. That's what this is."

"Colostrum, organ blend, probiotics. The whole stack. One scoop."

"You put effort into what they eat. This is what the research says they're missing."

KEY MESSAGES

What the brand keeps coming back to

1. **Everything your family needs in one scoop.** Not 8 different capsules. Not a shelf of synthetic supplements you're guessing at. One daily powder with the nutrition that actually matters.

2. **Whole food, not chemistry.** Liver, heart, spleen, kidney, lung — real organs from real animals, not synthetic vitamins manufactured in a lab. Your body knows the difference.

3. **No synthetics. No fillers.** A prebiotic, a probiotic, and a superfood antioxidant stack — all built around the organ blend. Nothing artificial.

4. **Bear lives this.** This is not a celebrity licence deal. Bear has been eating like this in the field for 30 years. Modern Savage is what he actually uses.

5. **For the whole family.** Same philosophy in the Kids Blend — organ nutrition from childhood, not just adulthood. One brand, one mission, for everyone who wants to eat like they were designed to.

UNIFYING BRAND THREAD

"Everything we build is in service of giving the body what it was designed to run on."

This is the internal through-line — not a marketing tagline, but the test every piece of content should pass. If it doesn't connect back to primal nutrition and what the body genuinely needs, it doesn't belong in the brand.

- **Year one:** Establish Modern Savage as the credible primal nutrition brand in the UK and US. Not niche — category leader.
- **Year two:** Outsell Heart and Soil in comparable markets.
- **Long term:** Make whole-food organ nutrition the household standard - not a niche product for biohackers, but the family supplement that replaces the shelf. On every health-conscious family's counter, the way a multivitamin used to be, but one that actually works.

NARRATIVE TERRITORIES

Mission narratives for social strategy

These are the narrative territories Modern Savage can authentically operate in. Each one represents a distinct problem that the product solves for a specific audience. Social strategy should build content pillars from these — each pillar educates on the problem, positions Modern Savage as the natural solution.

Family Nutrition — PRIMARY

"The same nutrition, for every member of the family. One product that covers the whole household."

This is the primary territory. The family angle is what separates Modern Savage from every competitor in this space. No other organ nutrition brand has built a product suite for the whole household — adult and child, one philosophy. Content should celebrate family health without being preachy.

Whole Food Simplicity — PRIMARY

"Stop guessing. One scoop replaces the shelf."

The convenience angle is underrated. Most health-conscious families are managing 6-10 different supplements with no clear picture of what they actually need. Modern Savage solves that — one daily powder with everything the body needs from whole-food sources. This is not dumbing down — it is the honest case for simplicity.

Real Ingredients, Real Sources — PRIMARY

"Your body was built to run on this. Modern food just forgot."

The case for eating the whole animal. Organs as the original superfood. What happened when humans stopped eating like this. The ancestral baseline vs the modern synthetic default. Evidence-led content on why whole-food nutrition outperforms synthetic supplements at the cellular level.

Gut and Long-Term Health

"Vitality is not a supplement category. It is what happens when you eat correctly."

Micronutrient density of organs. Bioavailability of animal-sourced nutrients. Gut health (prebiotic + probiotic stack). Energy, clarity, immunity. Content that takes the science seriously without being dry — accessible for a parent who isn't a nutritionist.

Provide and Protect

"Feed your family the way you were supposed to."

The duty to give children real nutrition from the start. The Kids Blend as an act of parental responsibility. "You wouldn't feed them synthetic vitamins if you knew there was a better option." Strongest angle for the Kids Blend specifically.

Family, Faith and Legacy

"What you feed your family is a statement about what you believe."

Values-driven nutrition. Building family health over generations. The Kids Blend as legacy thinking. Connects with the faith-adjacent, family-first audience that follows Bear — who is openly Christian and known for his family values.

Freedom from Broken Systems

"The supplement industry is broken. This is the alternative."

The case against synthetic vitamins. What the standard supplement industry doesn't tell you. Processed food as a system failure. The relief of finding something that is genuinely what it claims to be. Connects with the sceptic who has tried everything.

NOTE FOR SOCIAL STRATEGY

Three primary territories: **Family Nutrition**, **Whole Food Simplicity**, and **Real Ingredients**. The others are supporting angles that open the brand to different entry points. This is NOT a biohacking or performance brand - it is a family nutrition brand. Content should never feel like it's selling to a niche. Educate on the problem, let Modern Savage be the obvious solution.

COMPETITIVE LANDSCAPE

Where we sit in the market

The ancestral health supplement market is growing fast — US market moving from $512M to $1.23B+ by 2030. The primary benchmark is Heart and Soil (Paul Saladino). Our opportunity: the same product quality, with Bear Grylls' reach behind it.

Brand	Founder	Price	Form	Reach	Revenue est.	Ou
Modern Savage	Bear + Jesse Grylls	**~$79**	Powder	100M+ impressions/mo (Bear's social)	Launch Jul 2026	**Bec aut use**

Brand	Founder	Price	Form	Reach	Revenue est.	Ou
						rea Kid
Heart and Soil	Paul Saladino MD	$80/bag	Capsules	Carnivore community (large, loyal)	~$50M/yr	Ou ber Tar out yec
Lineage Provisions	Paul Saladino	$80/bag	Powder	Saladino audience	Growing	We cor dire for (po pov
Ancestral Supplements	Brian Johnson	~$45-65	Capsules	Strong US ancestral health following	Multi-million	Ca pov diff exp
Numan / Manual	Various	Varies	Various	UK consumer health	Large	No anc hec diff cat ent

Our unfair advantage

Bear Grylls has 100M+ impressions per month across social channels. No ancestral health brand has that kind of distribution. Heart and Soil built to $50M primarily through Saladino's podcast audience. Bear's reach is 10x larger across mainstream channels.

Every competitor in this space positions to the same audience: male, US, carnivore-adjacent. Modern Savage is the first organ nutrition brand built deliberately for families — not just a nod to a Kids SKU, but a whole-family mission. That is the whitespace. That is how we win mainstream.

What to avoid

Do not position as a biohacking brand, a performance supplement, or a male health product. That market is already owned by Heart and Soil and Saladino. Our edge is the family and whole-food angle they have left open. Own it.

LAUNCH DETAILS

July 2026 — UK and US simultaneously

Now–Jun — **Pre-launch build**

Social presence established. Influencer seeding underway. Brand voice locked. Content pipeline built. Community forming around ancestral nutrition content.

Jul 2026 — **Launch — UK + US simultaneous**

DTC website live in both markets. Bear posts. Seeded influencers post. PR push. Paid social activates. Goal: first 1,000 customers in launch window.

Aug–Dec — **Scale and retention**

2027

Category leadership

Outsell Heart and Soil in comparable markets. Brand recognised as the definitive primal nutrition brand. Family SKU (Kids Blend) driving household adoption.

KEY LAUNCH FACTS

Launch markets: UK and US simultaneously

Launch month: July 2026

Route to market: DTC first (own website)
